AWARD OF EPCM SERVICES AGREEMENT

SPMP is pleased to announce the award of an EPCM Services Agreement for the Engineering, Procurement and Construction Management, for its Oman Antimony Roaster (OAR1) project, located in the Port of Sohar Freezone, to WorleyParson Oman Engineering LLC.

The planned schedule of work is for 18 months. Commissioning of the world's first major antimony roaster outside of China in decades, designed to modern environmental standards, is due for September 2017.

This is a significant milestone for SPMP and its partners.

We all look forward to working with the WorleyParsons team in delivering this important facility for the world antimony market and also adding to the development of the minerals processing industry in Oman.

Yours faithfully

Emin Eyi
Chief Executive Officer
